Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE three MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1761

Applicant's election with traverse of Group I (new claims 22-36) in Paper No. 7 is acknowledged. The traversal is on the ground(s) that "the claimed process is particularly suited for the manufacture of the claimed product". This is not found persuasive because the product as claimed can be made by another and materially different process.

The requirement is still deemed proper and is therefore made FINAL.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 22-36 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Chase et al (WO 94/28181).

Chase et al teach a dextrose hydrate which is greater than 99.5% dextrose, has a crystallinity of 100%, has an α form of 100%, and has a moisture content of 8-9%.

The claims appear to differ as to the specific recitation of compressibility.

Art Unit: 1761

The claimed compressibility would be inherent and/or obvious to that of Chase et al as the product has all the same attributes.

All of the claim limitations have been considered. None of them are seen as serving as basis for patentability.

No claim is allowed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Edwards discloses crystallization of dextrose monohydrate (see entire document), and Serpelloni discloses conventional compressibility numbers for a powder (see entire document).
